

Press Release

New Supervisory Board Members in APK: Dr. Carsten Heldmann and Dr. Udo Jung

Dr. Carsten Heldmann and Dr. Udo Jung join the Supervisory Board with immediate effect

„Due to their extensive industry experience, Dr. Heldmann and Dr. Jung are ideal additions to our Board. In particular, their knowledge of markets, technologies and strategy will accelerate APK as we achieve our growth targets,” said Dr. Sören Hein, Chairman of the Board.

Dr. Heldmann has many years of operational experience in polymer applications and in the successful leadership of organisations. He has held several Managing Director and CEO positions in the chemical and polymer-processing industries, including the Kalle Group and the “Food and Consumer Packaging” division of Klöckner Pentaplast with 4,500 staff and 22 plants worldwide.

Dr. Jung joined Boston Consulting Group in 1980. As a Senior Partner and Managing Director he has been responsible for numerous projects along the entire polymer value chain globally, including both virgin material and recycle.

About APK AG

Plastic waste is a dominant problem of our time. APK AG has developed a suite of environmentally sound and market-leading recycling technologies under the Newcycling® brand which will safeguard raw materials for the coming generations. APK's pilot plant in Merseburg, Germany is unique worldwide, and the technology has already been successfully industrialised at this location. Further plants are being planned.
